DETAILED ACTION

Allowable Subject Matter

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance:

Bandes et al ('006) teaches a MEMs device having a trench between a pair of electrodes with a gate electrode formed within the trench (Fig.10 (705)) suspending defined pattern of nanotube fabric (703) so that at least a portion is vertically suspended in spaced relation to the vertical walls of the trench and positioned so that the vertically suspended defined pattern of nanotube fabric is electromechanically deflectable into electrical communication with one of the drain and source of a first transistor (702/704). However, prior art fails to teach that the suspended nanotube fabric is formed between the one source and drain of a first transistor and one of the source and drain of the second transistor to form an electrical communication path between two transistors. Therefore claim 1 contains allowable subject matter. Claims 2-7 depend from claim 1 and are therefore also deemed to be allowable over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
